## HP-6003 Service Deionization Tank

Expansa offers 30 cuft service deionization (SDI) tanks as a cost-effective and convenient solution for producing ultra-pure water across various applications. Common uses include high-pressure boiler feed water, industrial process water, hydrostatic testing, semiconductor manufacturing, and other general industrial needs. Our systems support flow rates ranging from 35 to 100 GPM, delivering water with resistivity levels up to 18.2 megohm-cm.
